DETAILED ACTION

1. This Office Action is a response to communications dated 10/20/05. Claims 1, 3-4, 7 and 12-13 are pending in the application.

Drawings

2. The drawings were received on 10/20/05. These drawings are approved.

Allowable Subject Matter

3. Claims 1, 3-4, 7 and 12-13 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed bit rate detection circuit, comprising, among other limitations, a novel and unobvious limitation of *"logic circuitry responsively coupled to said shift registers and configured to provide an output signal indicative of the data rate by detecting a first pattern or 1010 or 0101 in first selected bits in the framing bytes in the shift registers, detecting a second pattern of 101 or 010 in second selected bits in the framing bytes in the shift registers, detecting a third pattern of 1001 or 0110 in third selected bits in the framing bytes in the shift registers, and setting the value of the output signal to indicate the first, second or third rate in dependence upon which of the first, second and third patterns are detected"*, structurally and functionally interconnected with other limitations in a manner as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
